FORD07SS

WHAT'S IN THE BOX

Intermediate Pipe

Made from Mandrel Bent S409 tube and fitted with solid 12mm and 10mm hangers for an OE fit. Retains factory DPF gasket.

Muffler Delete Pipe

Most modern diesel vehicles are fitted with efficient particulate filters that remove a large volume of sound emissions - hence why we have designed this system solely with a muffler delete pipe as standard.

Tailpipe Assembly

The tailpipe is Mandrel Bent from 3" S409 tube and connects to the Resonator Pipe with a single bolt clamp. Optionally you can upgrade to a side exit pipe - see below for details.

Full Fitting Kit

As with all Outlaw Performance Exhaust kits, our FORD07SS comes complete with high quality gaskets and all hardware required for install. Replacement parts including rubber mounts are carried at all of our branches nationwide.

OPTIONAL UPGRADE TO SIDE EXIT TAILPIPE

Upgrade your FORD07SS with our optional side exit tailpipe which features dual polished 304 Stainless Steel outlets. Easily interchangeable with the existing tailpipe by releasing the single bolt clamp. Comes complete with a new E-Coated rear hanger mount ensuring accurate reliable fitment. Order code FORD09TPK.

* Fitment and design confirmed on MY22 Ford Ranger Wildtrack with long range fuel tank. Whilst all efforts have been made to ensure fitment accuracy based on the data available to Mercury Mufflers, certain generations and factory/aftermarket components may result in the modification of the supplied Exhaust upgrade. Mercury Mufflers do not take responsibility for additional charges that may be required in the event of these circumstances. The 5-year warranty provided on Outlaw Exhaust systems covers only the supplied product at time of purchase. Catalytic Converters used are covered for 12 months from date of fitment. Modifications, penalties, or damage caused from fitment is not covered under our warranty conditions. Engine management lights may be illuminated when fitting this aftermarket exhaust due to DPF settings.
