

Towbar Fitting Instructions
To Suit Ford RTV Cab Chassis & Tub body
Part Number QTFD993L
Rating 2300Kg 10/03-on

1. Ensure all hardware items have been included.
2. Remove spare wheel.
3. Remove exhaust from three rear most rubber hangers.
4. Lift towbar into position and fit six M12 x 100 bolts, loose plates through chassis and towbar loosely. (additional loose plates maybe required to fit between sidearm and chassis rail to allow for vehicle variation)
5. Fit six M10 x 30 taptite bolts through towbar and into vertical holes in under side of chassis rail and rear cross member.
6. Tighten all taptite bolts to torque listing.
7. Tighten six M12 x 100 bolts to torque listing. **Ensure bolts are not over tightened as chassis rails may crush**
8. Using holes in tail mounting plate as guide drill 11mm hole.
9. Fit tapped plate on wire through larger hole forward of hole drilled, fit bolt and torque to listing.
10. Refit exhaust and spare wheel.
