

WARNING: 1. Do not drill, cut weld or otherwise modify the towbar.

- 2. If you are using electric welding on a motor vehicle, <u>always</u> check that the vehicle is not equipped with electronic engine or instrument management equipment. Failure to do so could <u>destroy</u> any onboard computers. If in doubt, check with the vehicle's manufacturer.
- 1. Ensure all hardware items have been included
- 2. It is recommended that the instructions are read through and completely understood before making any attempt to fit this product.
- 3. Be wary of any changes to vehicle designs or other accessories that may conflict with the installation of this product.
- 4. Ensure that all hardware is fastened to torque list below check fasteners on regular basis.
- 5. Remove the Tail-lamp bracket as shown in figure 1, by removing 4 bolts & disconnecting the wiring for the tail-lamps.
- 6. Lift towbar into position making sure side arms are to be on inner face of chassis with the tail-lamp bracket side mounts in between.
- 7. The same bolts used to fit the tail-lamp bracket to the chassis can be used to mount the towbar to the vehicle as well, as shown in Figure 2.
- 8. Tighten all bolts to torque listing.
- 9. Refit the tail-light bracket as in reverse of step 6.
- 10. Towbar load rating sticker provided with this product shall be conspicuously located on inside rear end of the driver's door. (See diagram below).
- 11.PLEASE NOTE: It is advised to remove your lug or TBM when not actually towing so as to produce a clear view of the vehicles registration plate if obscured, and to also provide maximum available departure angle.

Place load rating sticker inside driver's door here

QTMB225 HITCH ASSEMBLY

Tow bar Maintenance and Care.

Trailboss recommends that bolt torque's, as listed below, are routinely and regularly inspected and checked for correct tension. Replace any worn or defective parts.

We recommended to remove Tow Ball Mounts (TBM's, tongues or lugs) when not being used for any considerable length of time.

So as to avoid injury, when not towing it is suggested that the tongue, Pull Pin and R-clip are removed then stored in a safe, clean and dry place, away from excessive moisture.
