Step-By-Step Instructions

Warning:

Safety First: Always use correct safety equipment.

This towbar is NOT to be drilled, cut, welded or modified in any way.

Check the surrounding area before drilling into chassis or body panels for fuel lines, wiring harnesses and other components that may be a hazard.

General:

Before fitting this towbar read fitting instructions and check installation hardware is correct.

Check that the towbar is suitable for the vehicle and be wary of any changes to the vehicle design that may conflict with the fitting of this towbar.

After drilling, blow any filings clear, remove any swarf and treat exposed metal with a rust inhibitor.

If this vehicle requires a bumper cut out, please check to make sure that you measure twice and check twice before cutting any panels as some bumper profiles can change.

If you are not sure then ask your towbar supplier.

Tighten all bolts as specified on the last page.

1. Remove bumper bar
 - 1.1. Remove screws and clips from wheel arch.
 - 1.2. Remove two plastic scrivenets from bottom of bumper.
 - 1.3. Flex bumper sideways to unclip from body.
 - 1.4. Remove boot trim.
 - 1.5. Remove tail lights.
 - 1.6. Remove one screw and one scrivet from behind tail lights.
2. Remove impact beam and discard.
3. Release exhaust mount from chassis rail.
4. Fit tow bar to rear of car by sliding forward arms down chassis rail.
5. Fit 2 x M12 bolts and washers through bottom of chassis rail into welded nuts on forward arms of tow bar.

Towbar Fitting Instructions
